DETAILED ACTION

The following action is responsive to Applicant's response filed on 03/20/2009. Claims 1-2, 4-20 are currently pending. Claims 3 and 21 have been cancelled.

Response to Arguments

1. Applicant's arguments, see pgs 9-12, filed 03/20/2009, with respect to claims 1-20 have been fully considered and are persuasive. All rejections pertaining to the above claims have been withdrawn.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-2, 7, 9, 12-15, 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsuo (JP 3185323 hereinafter "Matsuo").

Regarding claims 1-2, Matsuo discloses a process for stabilizing a polymerizable compound comprising adding at least one free radical scavenger which comprises at (1) at least two glycine units and (2) at least one amide unit, at least one ester unit, or at least one amide unit and one ester unit

Art Unit: 1796

further discloses the ester unit to include $\text{CH}_3\text{CH}_2\text{CH}_2\text{CH}_2\text{CH}(\text{C}_2\text{H}_5)\text{CH}_2$ [0013], satisfying the limitations of claim 2 where R7 and R8 are both C7 alkyl.

Regarding claim 7, Matsuo discloses R7 and R8 as both C7 alkyl [0013].

Regarding claim 9, Matsuo discloses X = C2 alkyl [0013].

Regarding claims 12-14, Matsuo discloses the process according to claim 1, further comprising adding at least one costabilizer (hydroquinones, [0006]).

Regarding claims 15 and 18, Matsuo discloses the process wherein the polymerizable compound consists of (meth)acrylic acid [0003].

Regarding claims 19-20, Matsuo is relied upon in the rejections above.

Allowable Subject Matter

2. Claims 4-6, 8, 10-11, 16-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Regarding claims 4-6, the prior art of record does not disclose or suggest the amide group(s) as claimed by the applicant usable in the free-radical scavenger compound. Nor does the prior art disclose the free-radical scavenger compound to include ester units consisting of the groups taught by claim 8, or the specific free radical scavengers listed in claim 10. The prior art of record does not disclose the taught range of free radical scavenger used as

Art Unit: 1796

0.1 to 1,000 ppm as taught in claim 11, nor the specified polymerizable compounds or claims 16 and 17.
